VERSION WITH MARKINGS TO SHOW CHANGES MADE

The claims have been amended as follows:

- 5. (Amended) Use according to one of Claims 1—to 4, in which the gas is chosen from among helium, oxygen, nitrogen, xenon, hydrogen, carbon monoxide (CO), carbon dioxide (CO₂), argon, krypton, nitrogen monoxide (NO), nitrogen protoxide (N₂O), carbonated hydrocarbons, fluorocarbons and mixtures of several of these gases.
- 6. (Amended) Use according to one of Claims 1—to 5, in which the inhalable medicament is in the form of an aerosol comprising said gas and said active product in the form of a powder, liquid or a powder/liquid mixture.
- 7. (Amended) Use according to one of Claims 1—to 6, in which the inhalable medicament contains a therapeutically effective quantity of active product.
- 8. (Amended) Use according to one of Claims 1—to 7, in which the combination of said at least one gas with said at least one active product leads to a synergistic effect.
- 9. (Amended) Use according to one of Claims 1—to 0, in which the inhalable medicament contains at least one gas chosen from CO and NO, preferably a gas mixture containing NO and CO, and at least one active product with an anti-inflammatory action.

Laurent LECOURT et al.

- 10. (Amended) Use according to one of Claims 1—to 9, in which the inhalable medicament contains at least one gas chosen from O_2 and N_2O .
- 11. (Amended) Use according to one of Claims 1 to $\frac{10}{10}$, in which the inhalable medicament contains O_2 and N_2O , and at least one active product with an analgesic or morphine-like action.
- 15. (Amended) Device for delivering an aerosol, comprising:
- a reservoir (1) equipped with a reservoir opening (6),
 - a membrane (3) comprising a membrane opening (5), said membrane (3) being hermetically inserted into the reservoir opening (6), and
 - a valve rod (2) passing through the membrane opening(5) and the reservoir opening (6) and being hermetically inserted in and sliding in the membrane opening (5),

characterized in that the reservoir (1) contains an inhalable medicament (4) formed by a combination of at least one gas and at least one active product with an analgesic action, in particular a gas according to Claim 13 and/or an active product according to Claim 12.
